

## Projektbeschreibung

Six Construct, a subsidiary of the BESIX Group, is the largest Belgian construction company operating in the Middle East. In July 2018 ELA Container Middle East supplied the first modular Six Construct site office for Dubai Creek in Al Jadaf. The 32 container complex was built to accommodate the most modern and technologically advanced construction site office in the region: an array of modular rooms on two levels which can be rearranged at ease to expand or decrease work areas. It boasts two large meeting rooms and informal lounge areas for team members to meet and discuss. All areas are fully air conditioned and house modern sanitary facilities. The ELA containers are highly insulated with rock wool, thus strongly reducing the energy consumption for the air conditioning of the site offices. The modular system of ELA containers allows Six Construct to quickly move, re-use and adapt the site offices for future use on new sites. As ELA containers comply with standard road permissions, the movability and transportation costs can be optimized further reducing costs and CO2 emissions for Six Construct. The strong and robust build structure of the ELA containers allowed Six Construct to place solar panels on top of the roof, thus further supporting the sustainability drive and further reducing operational costs.

Further Six Construct sites are being implemented with ELA containers as the group has made an active decision to partner with ELA containers in the region and to modernize all its future construction site offices with ELA modular site offices.

## Details

Location:	Dubai Creek, Al Jadaf, UAE
Type and number of containers:	32 ELA quality all-rounder
Usable space:	approx. 480 m <sup>2</sup>
Usage:	site office
Room solutions:	office rooms, meeting rooms, informal lounge area, sanitary rooms
Special equipment:	fully aircondition, highly insulated with rockwool, exterior in company colours

Modern construction site in corporate colours

Informal meeting areas for team members

Bright, open office spaces

Fully air conditioned office spaces

Fully air conditioned large meeting rooms

Rooms designed in corporate colours

Bright and friendly hallways

Fully air conditioned sanitary facilities

Modern sanitary facilities

Office levels connected by staircases

Solar panels on top of the roof

Design in corporate colours
